TASK ORDER MANAGER (TOM)

(a) The Task Order Manager for this task order is:

Name: Joe McClure Mailing Address: 101 Strauss Ave

Code: 138A Telephone No.(301) 744-4628 x276

(b) The Alternate TOM for this contract is:

Name: Mailing Address:

Code: Telephone No.

(c) The TOM will act as the Contracting Officer's representative for technical matters, providing technical direction and discussion, as necessary, with respect to the specification or statement of work, and monitoring the progress and quality of contractor performance. The TOM is not an Administrative Contracting Officer and does not have authority to direct the accomplishment of effort which is beyond the scope of the statement of work in the task order.

(d) When, in the opinion of the contractor, the TOM requests effort outside the existing scope of the task order, the contractor shall promptly notify the contracting officer (or ordering officer) in writing. No action shall be taken by the contractor under such direction until the contracting officer has issued a modification to the task order, until the ordering officer has issued a modification to the task order; or until the issue has been otherwise resolved.

(e) In the event that the TOM named above is absent due to leave, illness or official business, all responsibility and functions assigned to the TOM will be the responsibility of the alternate TOM.

SUBMISSION OF INVOICES (COST-REIMBURSEMENT, TIME-AND-MATERIALS, LABOR-HOUR, OR FIXED PRICE INCENTIVE) (JUL 1992)

(a) "Invoice" as used in this clause includes contractor requests for interim

payments using public vouchers (SF 1034) but does not include contractor requests for progress payments under fixed price incentive contracts.

(b) The Contractor shall submit invoices and any necessary supporting documentation, in an original and copies, to the contract auditor* at the following address:

unless delivery orders are applicable, in which case invoices will be segregated by individual order and submitted to the address specified in the order. In addition, an information copy shall be submitted to the TOM and NAVSEA INDIAN HEAD, Comptroller Code 021. Following verification, the contract auditor* will forward the invoice to the designated payment office for payment in the amount determined to be owing, in accordance with the applicable payment (and fee) clause(s) of this contract.

(c) Invoices requesting interim payments shall be submitted no more than once every two weeks, unless another time period is specified in the Payments clause of this contract. For indefinite delivery type contracts, interim payment invoices shall be submitted no more than once every two weeks for each delivery order. There shall be a lapse of no more than calendar days between performance and submission of an interim payment invoice..

(d) In addition to the information identified in the Prompt Payment clause herein, each invoice shall contain the following information, as applicable:

- (1) Contract line item number (CLIN)
- (2) Subline item number (SLIN)
- (3) Accounting Classification Reference Number (ACRN)
- (4) Payment terms
- (5) Procuring activity
- (6) Date supplies provided or services performed
- (7) Costs incurred and allowable under the contract

(8) Vessel (e.g., ship, submarine or other craft) or system for which supply/service is provided

(e) A DD Form 250, "Material Inspection and Receiving Report",

is required with each invoice submittal.

XX is required only with the final invoice.

is not required.

(f) A Certificate of Performance

shall be provided with each invoice submittal.

XX is not required.

(g) The Contractor's final invoice shall be identified as such, and shall list all

other invoices (if any) previously tendered under this contract.

(h) Costs of performance shall be segregated, accumulated and invoiced to the

appropriate ACRN categories to the extent possible. When such segregation of costs by ACRN is not possible for invoices submitted with CLINS/SLINS with more than one ACRN, an allocation ratio shall be established in the same ratio as the obligations cited in the accounting data so that costs are allocated on a proportional basis.

SECTION C DESCRIPTIONS AND SPECIFICATIONS

PERFORMANCE BASED

DEVELOPMENT AND SUPPORT SERVICES

for

VIRTUAL TRAINING SYSTEMS

1.0 GENERAL

1.1 Introduction

The Indian Head Division, Naval Surface Warfare Center (IHD/NSWC) requires assistance in the development and support of virtual training systems to support various training needs of Joint and Service program offices, as well as other Federal Departments and Agencies. IHD/NSWC's customers have requirements for total quality management of training requirement documentation, acquisition, content development, courseware development, system manufacturing and/or development, and life cycle support for training systems.

Continuous visual database and image generation technology innovations have enabled rapid enhancements in Commercial Off The Shelf (COTS), Personal Computer (PC)- based synthetic training systems. A goal of this program is to leverage from these new technologies to develop COTS deployable training systems and Distance Learning (DL) centers. The intent is to provide warfighters with robust, virtual mission rehearsal and training systems. These systems must have a comprehensive mission editor, the ability to train and rehearse combat convoy and small unit operations, ability to vary environmental and terrain conditions, photo-realistic portrayal of weapon systems and vehicles, and After Action Reporting (AAR) capability. This generation of highly deployable and highly capable pc-based synthetic environment training systems will significantly improve the quality of training and thus the readiness of Joint forces through initial and sustainment training.

1.2 Scope

The scope of this task order is for the contractor to provide system engineering support, integration engineering support, content development, courseware development, training support, life cycle support, and documentation for synthetic pc-based training systems. General areas of work include:

- Integration engineering services for the Synthetic Environment and Data Representation and Interchange Specification (SEDRIS) that supports the standardization of visual databases for visual image generation in synthetic simulation and training.
- Overarching engineering support for the design, development, testing, and fielding of Joint synthetic training systems.
- Development and delivery of enhancements and add-on packages to Joint small unit cognitive skills pc-based synthetic training systems for additional functionality, including mission rehearsal and force protection operations support.
- Development of new interchangeable training models and simulation scenarios for joint synthetic training systems.
- Documentation development, equipment modifications, and installation services to provide training support to existing simulation labs and schools.
- Integration engineering and engineering management support for Automated Electronic Classrooms (AECs), Distance Learning (DL) labs and deployable DL equipment for joint synthetic training.
- Programmatic and Acquisition Management support to Government personnel and programs to assist in the development of management plans and strategies, milestone planning and tracking, evaluations of program schedules, and deliverable tracking.
- The development and delivery of training and technical support for the Joint Capabilities Integration and Development System (JCIDS) process.

2.0 APPLICABLE DOCUMENTS/REFERENCES

Unless otherwise specified, the following document listed forms a part of the Statement of Work and is to be used for general guidelines only.

· DON M&S Verification, Validation and Accreditation Implementation Handbook (April 2001)

3.0 REQUIREMENTS

3.1 Synthetic Environment Data Representation and Interchange Specification (SEDRIS) Support

The contractor shall provide the Government with systems engineering, modeling and technical documentation support for the continued development and enhancements to the Joint Synthetic Environment Data Representation and Interchange Specification (SEDRIS) program for all training systems with visual database representations. The contractor's support shall include:

3.1.1 The contractor shall provide the Government with scientific and systems engineering support at all SEDRIS conferences, all SEDRIS engineering meetings and teleconferences that are scheduled by the Government. This shall be expert support by experienced SEDRIS engineers, which have a detailed understanding of the current synthetic training environmental representation technologies, environmental coding specifications, and SEDRIS Transmittal Format (STF) for modeling and simulation applications. Technical reports shall be provided to the Government as required.

3.1.2 The contractor shall make refinements to the 3-D sample model and supporting materials, generate specific sample data sets showing other field specific data representation model (DRM) areas, and continue the development of the plug-in to allow for componentized transmittals and a more flexible interface. The contractor shall assist in the Environmental Representation Technology Area in coordinating an acceptable process for environmental representations in models and simulations.

3.1.3 The contractor shall provide training system engineering support for the editing of the SEDRIS Multi-part Standard; provide engineering support for the Language Binding Standards, and the environmental data coding specification (EDCS) standards. The contractor shall comment to the standards and attend International Standards Organization / International Electro-technical Commission (ISO/IEC) meetings; write assigned sections of the DRM and Interface Specification (API) standards, attend reviews, and write assigned sections to the SEDRIS Technology Standardization documents.

3.1.4 The contractor shall assist the Government in developing the necessary metadata record and access methodologies to maximize the use of metadata representation within the scope of the proposed Integrated Natural Environment Authoritative Representation Program for simulation system visual database compatibility.

3.2 Scientific, System Engineering and Technical Support for Synthetic Training Environments

The contractor shall provide the Government with scientific, system engineering and technical support for the modification and enhancement of joint synthetic training systems. This support shall be required to support the objectives of individual Joint, Service, and Agency program offices. Efforts shall consist of systems engineering and technical support services such as requirements and functional analysis, system design and system evaluation for the purpose of transforming system needs into a system of preferred system configurations and their related performance parameters. These efforts comprise a top-down, iterative systems engineering process that may be required during any phase of the system's life cycle. Engineering and development support will include system modifications, prototype and evaluation systems, the development of new systems, applied research, analysis of legacy systems, and the modification and modernization of existing military systems. Typical system engineering subtasks to support the development and modification of a commercial or military hardware/software system shall include:

3.2.1 Functional Requirements Decomposition: The contractor shall utilize the system engineering process to decompose functional requirements during the analysis phase.

3.2.2 Preliminary Design: The contractor shall use the approved system requirements and functionally allocate each system requirement to appropriate hardware and software solutions. Alternate solutions shall be identified and evaluated.

3.2.3 Architecture Development: Develop architectural documents that consist of process narrative, process flow maps, information exchange requirements (IERs) matrices, and stacked lists of source and receiver nodes.

3.2.4 Supportability Planning: Provide Life Cycle Cost and Supportability Analysis, as well as a plan for

maintenance and sparing.

3.3 Enhancements and Add-ons to Synthetic Training Systems

The contractor shall provide the Government with modifications and enhancements to pc-based small unit cognitive skills training systems to enhance Joint training effectiveness. This support shall include:

3.3.1 Development of models, missions, scenarios, and scripts to focus the training audience on mission planning and rehearsal actions.

3.3.2 Develop an enhanced force protection capability that will encompass rear-area security operations, convoy operations, port security, harbor security, airport security, naval at-sea force protection activities, and prisoner/refugee security operations.

3.3.3 Modifications and enhancements to the After Action Review (AAR) capability to facilitate dynamic 2D and 3D, and audio, recording and playback of missions immediately upon their conclusion.

3.3.4 Incorporating Distributed Interactive Simulation (DIS) / High Level Architecture compliance into the training systems.

3.4 Development of New Interchangeable Training Models and New Simulation Scenarios

The contractor shall provide the Government with systems engineering and modeling support for the development of interchangeable visual training models and simulation scenarios for joint synthetic training systems. This support shall include:

3.4.1 Design and develop synthetic terrains, models, and animations. The contractor shall develop synthetic wire-frame 3D models, the appropriate equations of motion, and at least seven (7) levels of representation (detail) for vehicles, weapons, and specific avatars as specified by the Government in the design reviews. These models shall be complete, error-free in their 3D visual representation, and be completely compatible with the common synthetic training environment.

3.4.2 Design, develop and deliver simulation scenarios. The contractor shall develop simulation scenarios and add-on packages for Joint sponsors. This content development shall consist of the following:

- Development of new scenarios using existing terrain models that focus on the dismounting of traditionally mounted troops and the continuation of the training mission. Scenarios will be developed in coordination with military Subject Matter Experts (SMEs).
- Development of scenarios focused on Force Protection, Rear Area Security, and Replenishment Operations. Scenarios will be designed to use geo-specific terrain databases and generic terrain models. Cultural features and non-combatants shall also be modeled and their behaviors simulated. Scenarios will be developed in association with military SMEs.
- Develop a specific scenario to be used for the visual identification (ID) of ground and air vehicles. Scenario will use existing terrain and 3D models of vehicles already developed. The instructor may edit which models are shown within the recognition scenario.

3.4.3 Within the Virtual Battlefield System training device, design and develop additional synthetic simulation features as required by Joint sponsors. These may include new terrains and cultural features, models and animations, missions and scenarios, and additional mechanisms to capture training results and feedback.

3.5 Training Support for Simulation Labs/ Schools

The contractor shall provide the Government with documentation development, equipment modifications, and installation services to provide training support to simulation labs and schools. This support shall include:

3.5.1 The contractor shall install new synthetic training system software as developed and required at existing Government simulation labs. The contractor shall ensure that software is updated to the current version and that all student and instructor stations are operating properly.

3.5.2 The contractor shall develop instructional courseware, as required, with material specialized to train the instructors on mission operation, modification of current training scenarios, development of new training scenarios, and advanced concepts in training lab operation.

3.5.3 The contractor shall perform synthetic training system installations on ships, new simulation labs and

individual locations as specified by the Government. Specific locations will be determined by the Government during formal design reviews, and approved for contractor installations.

3.5.4 The contractor shall develop training guides for use, as required, as read-ahead packages for personnel / units using Simulation Labs (SIMLABS) for training events. Subject guides will cover all current software packages available for use in training in the SIMLABS. The guide will present an overview of the Labs, operating procedures, software available, and the various scenarios available within each piece of software along with the associated Tactics, Techniques, & Procedures (TTP) tasks, conditions, and standards.

3.6 Distance Learning (DL) Planning, Execution, and Assessment

The contractor shall provide the Government with systems engineering, integration engineering and engineering management support to plan and execute joint synthetic training in Automated Electronic Classrooms (AECs), Distance Learning (DL) platforms, and deployable DL systems. This support shall include:

3.6.1 Develop final concepts of operation (CONOPs) plan with updates on the synthetic training project implementation, capabilities and responsibilities of each participant to include the effected operating forces, the technical process to be used for the development, delivery and disposition of training system hardware and software. The plan shall be forwarded to the Government for review and subsequent approval. The contractor shall maintain the document, issue change pages, and post revisions on the synthetic training system web site.

3.6.2 Develop training scenarios for Government sponsored DL applications. This shall include the development of DL Roadmaps, Technology Transition plans and full equipment disposition.

3.6.3 Develop and facilitate a Test and Evaluation Plan (TEP). The TEP will articulate synthetic training system project requirements and objectives, outline test scenarios for each DL application and DL training activity, state measures of effectiveness (MOE), measures of suitability (MOS), data collection technique, data analysis, and reporting. The plan shall be presented to the Government for review and approval.

3.6.4 Develop and facilitate government and contracted military and technical SMEs for scenario development, system implementation and assessment of synthetic training system in deployable and static AECs.

3.7 Programmatic and Acquisition Support

The contractor shall provide programmatic and acquisition support to Government personnel and programs. This support shall include:

3.7.1 Assist in the development of management plans and strategies, milestone planning and tracking, preparation of technical briefing materials in both hard copy and soft copy format, evaluations of program schedules, and deliverable tracking to include the planning, and/or reviewing of program data deliverables. The contractor may be required to organize, attend or host, and facilitate program meetings/IPT discussions as directed by the Government. The contractor shall assist in preparing and coordinating the agenda to key meetings, prepare presentation materials, and draft the minutes and action items for appropriate action. The Government will conduct reviews of the activities, provide technical direction, and approval of all major activities undertaken by the contractor.

3.7.2 Assist in developing or reviewing acquisition strategies; acquisition concept development; acquisition documentation; acquisition design, development, test or production documentation; acquisition budgetary or financial information. Assist in developing the strengths and weaknesses of various acquisition strategies and acquisition concepts, as well as the development of and/or reviewing request for proposal and program execution documents as directed.

3.7.3 Provide updates to the Government on changes in Requirements and Acquisition policy associated documentation required for major program milestones.

3.7.4 Provide acquisition support in coordinating multiple efforts across various branches of service, various program offices, supporting the acquisition IPT in formulating milestones, schedules, top-level system requirements, and combined acquisition strategy.

3.7.5 Assist with defining, developing, analyzing and monitoring program financial data such as reconciliation of Cost Performance Reports (CPRs) and Cost Schedule Status Reports (CSSRs).

3.7.6 Establish reliable and effective methods of communications for coordinating PM support via E mail,

high-speed data transfer, contractor-developed secure project web sites, 30 Hz Video Teleconferencing (VTC), voice, and fax.

3.7.7 Provide technical assistance in the development and operation of an internet-based collaborative work environment providing access to members of the IPT.

3.7.8 Provide issue resolution assistance between program management, requirements, oversight, test and evaluation, policy agencies, as well as contractors, as directed by the Government. This will include liaison with designated agencies, conducting research, and providing recommendations.

3.8 Joint Capabilities Integration and Development System (JCIDS) Process Training and Support

The contractor shall provide expert support in the Government's budgetary and requirements development process for Joint weapon system and subsystem acquisition. This shall include the development and delivery of customized training and technical support for the JCIDS process.

3.8.1 The contractor shall customize Joint Staff Instruction 3710.01C / JCIDS curriculum and courseware, and develop and/or modernize the associated computer-based and web-based training for specified JCIDS requirements and acquisition courses.

3.8.2 The contractor shall prepare and deliver beginner, intermediate, advanced, executive overview, and refresher courses for JCIDS, as well as on-call phone support with interactive courseware and Web-based courseware after the courses are delivered.

3.8.3 The contractor shall provide JCIDS support in the development of JCIDS products, such as: ICD, CDD, CPD documents, concepts, analyses, and assessments.

4.0 REPORTING REQUIREMENTS AND DELIVERABLES

4.1 The contractor shall submit monthly status reports. These reports shall include the following elements:

§ Contractor's name and address

§ Contractor number

§ Date of report

§ Period covered by report

§ Man hours expended by discipline for the reporting period, and cumulatively during the task order

§ Cost curves portraying actual/projected conditions through the task order

§ Cost incurred for the reporting period and total contractual expenditures as of report date

§ Description of progress made during period reported, including problem areas encountered, recommendations, if any for subsequent solution beyond the scope of this task order;

§ Trips and significant results; and

§ Plans for activities during the following period

4.2 The contractor shall provide such additional reporting, documentation, schedules, illustrations and drawings in a timely manner, as are requisites to the various task activities of the contract. Contractor shall provide a listing keyed to specific tasks identifying the minimum reporting deliverables associated with each task. Reporting should be in sufficient detail and of a quality to meet relevant ISO guidelines / standards and will include, but not be limited to:

- Technical reports, instructional/training documentation, courseware, data compilations, and data surveys, evaluations, and analyses
- Testing procedures, requirements, assessments, calibrations, and schedules
- Specifications, tabulations, engineering drawings, designs, concepts, diagrams, and circuits
- Maintenance requirements, guidelines, schedules, procedures, instructions, corrective actions, etc.
- Conference agenda, conference minutes, and presentation materials
- Purchase descriptions, proposals, equipment illustrations, program planning, support, and budget documentation and funding plans

5.0 GOVERNMENT FURNISHED EQUIPMENT (GFE)/ GOVERNMENT INFORMATION

The Government shall furnish the contractor with operational mission engineering data and Subject Matter Experts (SMEs) as required for the development of tactical synthetic warfare models and missions. The Government shall provide the use of the Government simulation labs during the period of installation of modified and updated software.

6.0 SECURITY

A SECRET security clearance is required at the time of contract award. All personnel proposed for this effort must be eligible for a SECRET clearance.

7.0 TRAVEL

The contractor may be required to travel in performance of this task order. Specific travel requirements will be negotiated as required. Costs associated with travel and lodging shall be reimbursed in accordance with the Federal Joint Travel Regulations (JTR).

8.0 DISCLAIMER STATEMENT

Any reports resulting from this contract shall contain the following disclaimer statement on the cover of such reports:

"The views, opinion and findings contained in this report are those of the author(s) and should not be construed as an official Department of Defense position, policy, or decision, unless so designated by other official documentation."

INDIAN HEAD DIVISION, NAVAL SEA SYSTEMS COMMAND, HOURS OF OPERATION AND HOLIDAY SCHEDULE

1. The policy of this station is to schedule periods of reduced operations or shutdown during holiday periods. Deliveries will not be accepted on Saturdays, Sundays or Holidays except as specifically requested by the Naval Sea Systems Command. All goods or services attempted to be delivered on a Saturday, Sunday or Holiday without specific instructions from the Ordering Officer or his duly appointed representative will be returned to the contractor at his expense with no cost or liability to the U.S. Government.

2. The scheduled holidays for Indian Head Division, Naval Sea Systems Command are:

HOLIDAY DATE OF OBSERVANCE

- New Year's Day 01 January
- Martin Luther King's Birthday 19 January
- President's Day 16 February
- Memorial Day 31 May
- Independence Day 5 July
- Labor Day 6 September
- Columbus Day 11 October
- Veteran's Day 11 November
- Thanksgiving Day 25 November
- Christmas Day 24 December

* If the actual date falls on a Saturday, the holiday will be observed the preceding Friday. If the holiday falls

on a Sunday, the observance shall be on the following Monday.

3. The hours of operation for the Procurement Department and Receiving Office are as follows:

AREA FROM TO

Procurement Department(BLDG. 1558) 7:30 A.M. 4:00 P.M.

Receiving Office (BLDG. 116) 7:30 A.M. 11:00 A.M.

12:30 P.M. 2:00 P.M.

If you intend to visit the Procurement Department, it is advised that you call for an appointment at least 24 hours in advance.

TECHNICAL INSTRUCTIONS

(a) Performance of the work hereunder will be subject to written technical instructions signed by the Ordering Officer specified in Section G of this task order. As used herein, technical instructions are defined to include the following:

(1) Directions to the Contractor which suggest pursuit of certain lines of inquiry, shift work emphasis, fill in details or otherwise serve to accomplish the contractual statement of work.

(2) Guidelines to the Contractor which assist in the interpretation of drawings, specifications or technical portions of work description.

(b) Technical instructions must be within the general scope of work stated in the task order. Technical instructions may not be used to: (1) assign additional work under the task order; (2) direct a change as defined in the "CHANGES" clause of the basic contract; (3) increase or decrease the task order price or estimated task order amount (including fee), as applicable, the level of effort, or the time required for task order performance; or (4) change any of the terms, conditions or specifications of the task order.

(c) If, in the opinion of the Contractor, any technical instruction calls for effort outside the scope of the task order or is inconsistent with this requirement, the Contractor shall notify the Ordering Officer in writing within ten (10) working days after the receipt of any such instruction. The Contractor shall not proceed with the work affected by the technical instruction unless and until the Contractor is notified by the Ordering Officer that the technical instruction is within the scope of this task order.

(d) Nothing in the foregoing paragraph shall be construed to excuse the Contractor from performing that portion of the contractual work statement which is not affected by the disputed technical instruction.

SECTION H SPECIAL CONTRACT REQUIREMENTS

SECTION I CONTRACT CLAUSES

In addition to the clauses in the basic contract, the following clauses are incorporated into the subject task order:

OPTION TO EXTEND THE TERM OF THE TASK ORDER

- (a) The Government may extend the term of this contract by written notice to the Contractor within 365 days of award or exercise of previous option; provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 60 days before the task order expires. The preliminary notice does not commit the Government to an extension.
- (b) If the Government exercises this option, the extended task order shall be considered to include this option clause.
- (c) The total duration of this task order, including the exercise of any options under this clause, shall not exceed 5 years.
